Hunar India - Geared Elevator

Hunar India delivers the highest standards to engineering, comfort and durability. Featuring a state of the art Geared Traction Machine, which can be housed separately in the elevator machine room, Hunar India is a result of years of research and technological innovation.

Hunar India comes with geared Traction machine made of high standard Chromium molybdenum Steel worm and Bronze gear.

State of the art micro controller technology with parallel communication protocol for precise control and utmost passenger safety.

SMT-Surface Mount Technology enhances the reliability and Scalability.

Uses PWM Dead Time Compensation technology and dynamic PWM Carrier Modulation technology to reduce noise and motor energy loss.

OUR MANUFACTURING PROCESS

Our laser cutting machines do more than just shape metal they shape **POSSIBILITIES**

HUNAR INDIA

But we're not just about hardware. Our design team, equipped with advanced 3D design software, is constantly pushing the boundaries of what's possible. They're not just engineers - they're dreamers and doers, committed to creating a future where everyone can reach new heights.

We invite you to join us on this journey of innovation and inclusion. Together, we can create a world where everyone has the opportunity to rise.

At Hunar India , we're not just about making elevators - we're about creating experiences. We believe in the power of design, in its ability to bring people together and make spaces more inclusive and accessible. That's why we blend cutting-edge technology with sustainable practices to craft elevator cabins, doors, and components that are as stunning as they are functional.

In our production facility, we're turning the ordinary into extraordinary. With the help of our highprecision laser cutting machines, we're shaping sheet metal into intricate designs that are as unique as the people who use our elevators.

They allow us to bring our innovative designs to life, creating sturdy and reliable elevator cabins and components that stand the test of time.
